

## **Working Visit of H. E. Demitu Hambisa, Minister for Science and Technology to Japan**

A delegation led by H. E. Demitu Hambisa, Minister of Science and Technology, is visiting Japan in order to share experience and strengthening cooperation in the areas of Science and Technology.

In a reception held yesterday at ambassador`s residence, the Minister pointed out that the government of Ethiopia has singled out Science and Technology as the driving engine of five year Growth and Transformation Plan. The minister said “the main reason of this visit is to seek for collaborations with Japanese Universities and institutions to be our partners in the transformation we are going through.” Officials and professors from different Universities, research institutions, government organizations and African ambassadors have attended this event.

During the stay, the delegation will visit various Universities and Science and Technology related research institutions and hold discussions with officials for possible collaborations in the field of Science & Technology.
